INDEX TO SUBJECTS

A

Abstracts presented at the eighth annual meeting of the American Society for Cell Biology, 1 a
Acid, extracellular release of by bone cells stimulated by parathyroid hormone, excretion and synthesis of lysosomal enzymes, biochemical and cytological study, 676
Actomyosin, natural and reconstituted, structure of as function of ionic strength, studies on preparations of treated with trypsin, EM study, 620
Agranular reticulum, and chondriome, of secretory cells of prothoracic glands of silkworms *Antheraea pernyi* and *Bombyx mori*, structural modifications of during last two larval stages, cytochemical and EM study, 501
Amphibia, urodele *Siredon mexicanum* and *Necturus maculosus* and anuran *Rana pipiens* and *Xenopus laevis*, size difference between liver and oocyte mitochondrial DNA molecules of, physical and EM study, 222
Amphibian, frog *Rana esculenta*, protein renewal in rods and cones of retina of, radioautographic EM study, 169
—, frog *Rana pipiens*, deposit formation in muscle fibers of following contraction in presence of lead, EM cytochemical study, 197
Annulate lamellae, and granular endoplasmic reticulum, hypertrophy of in Earle's L cells exposed to vinblastine sulfate, EM study, 211
Antibody-treated eggs, of sea urchin, effect of proteolytic enzymes on ultrastructure of, relation to fertilization, EM study, 481
Axon hillock, and initial segment, of small pyramidal neuron of cerebral cortex, of rat, light and EM study, 604

B

Bacteria, *Bacillus subtilis*, structural features of mesosomes (chondrioids) of, after freeze-etching, EM study, 251
Blood, lymphocytes, of human, fine structural alterations of interphase nuclei of, stimulated to growth activity in vitro, radioautographic and light and phase and EM study, 630
Bone cells, calvaria of mouse embryo, or cultured fibroblasts from rat embryo carcass, action of parathyroid hormone on excretion and synthesis of lysosomal enzymes and on extracellular release of acid by, biochemical and cytological study, 676
— marrow, of rabbit, differences in enzyme content of azurophil and specific granules of polymorphonuclear leukocytes of, cytochemical and EM study, 299
Bone marrow smears, of rabbit, differences in enzyme content of azurophil and specific granules of polymorphonuclear leukocytes of, histochemical study, 286

C

Calcification, in cartilage of chick embryo, changes in protein-polysaccharide associated with onset of, light and EM study, 43
Calcium phosphate, *in vitro* accumulation of by rat liver mitochondria, microincineration and electron diffraction and EM study, 55
Cartilage, of chick embryo tibia, changes in protein-polysaccharide associated with onset of calcification in, light and EM study, 43
Cell division, synchronized, in *Tetrahymena pyriformis*, following inhibition with vinblastine, cytological and light microscopic study, 556
—, exocrine, of guinea pig pancreas, dissociation of intracellular transport of secretory proteins from protein synthesis in, biochemical and radioautographic EM study, 580
—, exocrine, of guinea pig pancreas, metabolic requirements for intracellular transport of secretory proteins in, biochemical and radioautographic EM study, 589
— segments, of chicken skeletal muscle, mechanism of emptying of, biochemical and light microscopic study, C1
Cells, BHK21-F, of baby hamster kidney, infected with SV5 parainfluenza virus, role of microtubules in movement and alignment of nuclei in syncytia of, time-lapse photomicrographic and polarization microscopic and EM study, 526
—, bone, calvaria of mouse embryo, or cultured fibroblasts from rat embryo carcass, action of parathyroid hormone on excretion and synthesis of lysosomal enzymes and on extracellular release of acid by, biochemical and cytological study, 676
—, cultured, of carrot, incorporation of radioactive proline into, radioautographic EM study, 698
—, Earle's L cells, exposed to vinblastine sulfate, hypertrophy of granular endoplasmic reticulum and annulate lamellae in, EM study, 211
—, epithelial, of ileum of suckling rat, membrane modifications in apical endocytic complex of, light and EM study, 564
—, HeLa, turnover of nuclear DNA-like RNA in, biochemical study, 112
—, inflammatory, epithelial-mesenchymal inter-

relations and fibrogenesis in human skin wound repair, EM study, 152
Cells, mitotically active, evidence for two populations of in root meristems of bean *Vicia faba* labeled with thymidine-^{3}H, radioautographic study, 332
—, of root tip of bean *Phaseolus vulgaris*, atypical crista resembling "tight junction" in mitochondria of, EM study, 35
—, red, of mouse spleen, use of ^{55}Fe in high-resolution radioautography of, EM radioautographic study, 201
Cellular degeneration, in wing development of mutant vestigial of *Drosophila melanogaster*, light and EM study, 488
Cerebral cortex, of rat, axon hillock and initial segment of small pyramidal neuron of, light and EM study, 604
Chick, embryo, confronting subsurface cisternae in neuroblasts of spinal ganglia of, EM study, 485
—, embryo, tibial cartilage, changes in protein-polysaccharide associated with onset of calcification in, light and EM study, 43
Chicken, skeletal muscle, mechanism of emptying of cell segments of, biochemical and light microscopic study, C1
Chondrioids (mesosomes), of *Bacillus subtilis*, structural features of after freeze-etching, EM study, 251
Chondriome, and agranular reticulum, of secretory cells of prothoracic glands of silkworms *Antheraea pernyi* and *Bombyx mori*, structural modifications of during last two larval stages, cytochemical and EM study, 501
Chromosomes, of *Drosophila melanogaster*, DNA synthesis in, radioautographic study, 415
Cilia, atypical, in human endometrium, EM study, 475
—, of gill of freshwater mussel *Elliptio complanatus*, "sliding filament" model of motility of, EM study, 77
Circumfusion system for multipurpose culture chambers, protracted maintenance of differentiation of fetal and newborn mouse liver in vitro, cytochemical and light and EM study, 430
Cisternae, confronting subsurface, in neuroblasts of spinal ganglia of chick embryo, EM study, 485
Colchicine, effect of on microtubules in differentiating muscle cells of frog *Rana pipiens* and insect *Rhodnius prolixus*, light and EM study, 544
Crayfish, *Orconectes virilis*, intranucleolar membranes and nuclear-cytoplasmic exchange in oocytes of, EM study, 735
Crista, atypical, resembling "tight junction," in mitochondria of root tip cells of bean *Phaseolus vulgaris*, EM study, 35
Cytoplasm, of onion *Allium cepa* L. roots, radioactive label in following tritiated thymidine treatment, radioautographic, light, and EM study, 264

D

Differentiation, of fetal and newborn mouse liver, protracted maintenance of in vitro circumfusion system for multipurpose culture chambers, cytochemical and light and EM study, 430
DNA molecules, of liver and oocyte mitochondria, of urodele and anuran amphibia, size difference of, physical and EM study, 222
—, synthesis of in chromosomes of *Drosophila melanogaster*, radioautographic study, 415
—, synthesis of in mitochondria of *Tetrahymena pyriformis*, quantitative radioautographic EM study, 369

E

Eggs, antibody-treated, of sea urchin, effect of proteolytic enzymes on ultrastructure of, relation to fertilization, EM study, 481
Electron microscopy, chemically cleaved graphite support films for, description of technique and microdensitometric study, 733
Embryo, chick, confronting subsurface cisternae in neuroblasts of spinal ganglia of, EM study, 485
—, chick, tibial cartilage, changes in protein-polysaccharide associated with onset of calcification in, light and EM study, 43
—, of rat, aggregation and transformation of rat lymphocytes on fibroblast monolayers from, light and EM study, 392
Endometrium, of human uterus, atypical cilia in, EM study, 475
Endoplasmic reticulum, granular, and annulate lamellae, hypertrophy of in Earle's L cells exposed to vinblastine sulfate, EM study, 211
Enzyme content, differences of in azurophil and specific granules of rabbit polymorphonuclear leukocytes, histochemical study of bone marrow smears, 286
—, glutamic oxalacetic transaminase, localization of activity of in rat hepatic mitochondria fixed *in situ* and in vitro, biochemical and histochemical EM study, 725
—, glutamic oxalacetic transaminase, localization of activity of in rat liver cells, light and EM cytochemical study, 716
—, RNA polymerase, localization of endogenous activity of in frozen sections of corn seeds, radioautographic study, 745
—, trypsin, effect of on structure of natural and reconstituted actomyosin, study of actomyosin as function of ionic strength, EM study, 620
Enzymes, lysosomal, excretion and synthesis of by bone cells stimulated by parathyroid hormone, extracellular release of acid, biochemical and cytological study, 676
—, peroxidase, acid phosphatase, aryl sulfatase, 5′-nucleotidase and alkaline phosphatase, differences in content of in azurophil and specific granules of rabbit polymorphonuclear leukocytes, in bone marrow, cytochemical and EM study, 299
—, proteolytic, effect of on ultrastructure of antibody-treated sea urchin eggs, relation to fertilization, EM study, 481
Epithelial cells, of ileum of suckling rat, membrane modifications in apical endocytic complex of, light and EM study, 564

Epithelial-mesenchymal relationship, inflammatory cells, and fibrogenesis, in repair of human skin wounds, EM study, 152
Erythrophores, and pterinosomes, of goldfish, fine structure and biochemical characteristics of, cytochemical and biochemical and EM study, 233
Eye muscles, extraocular, of rabbit, fine structure of twitch and slow fibers of, EM study, 193

F

Fertilization, in sea urchin, effect of proteolytic enzymes on ultrastructure of antibody-treated eggs, EM study, 481
— in sea urchin, formation of zygote nucleus, EM study, 339
Fibers, muscle, of frog *Rana pipiens*, deposit formation in following contraction in presence of lead, EM cytochemical study, 197
—, twitch and slow, of rabbit extraocular muscle, structure of, EM study, 193
Fibroblast monolayers, of rat embyro, aggregation and transformation of rat lymphocytes on, light and EM study, 392
Fibroblasts, cultured from rat embryo carcass, or bone cells of mouse embryo, action of parathyroid hormone on excretion and secretion of lysosomal enzymes and on extracellular release of acid by, biochemical and cytological study, 676
Fibrogenesis, inflammatory cells, and epithelial-mesenchymal interrelations, in repair of human skin wounds, EM study, 152
Fibrous lamina, of *Amoeba proteus*, regulation of nucleocytoplasmic exchanges in early interphase by, EM study of gold distribution, 49
Filaments, of cilia of gill of mussel *Elliptio complanatus*, mechanism of ciliary motility, EM study, 77
Films, support, of chemically cleaved graphite, for electron microscopy, description of technique and microdensitometric study, 733
Filters, Millipore, fine structure and properties of, EM study, 208
Follicle, pre- and postovulatory, of amphibian *Necturus maculosus*, structure, pinocytosis, and biochemical activity in, biochemical and cytochemical and radioautographic EM study, 1
Frog, *Rana pipiens*, and insect *Rhodnius prolixus*, effect of colchicine on in vivo myogenesis in, light and EM study, 544
—, skeletal muscle, selective disruption of sarcotubular system of, quantitative study with exogenous peroxidase as marker, light and EM study, 451

G

Ganglia, spinal, of chick embryo, confronting subsurface cisternae in neuroblasts of, EM study, 485
—, trigeminal, of rat, and mouse cervical lymph nodes, fixed with pyroantimonate–osmium tetroxide, nuclear precipitates in, EM study, 216
Glycogen, localization of in parenchyma of rat tapeworm *Hymenolepis diminuta*, biochemical and light and EM study, 754
Goldfish, *Carassius auratus*, integumental erythrophores and pterinosomes, fine structure and biochemical characteristics of, cytochemical and biochemical and EM study, 233
Granules, azurophil and specific of rabbit polymorphonuclear leukocytes, differences in enzyme content of, histochemical study of bone marrow smears, 286
—, azurophil and specific of rabbit polymorphonuclear leukocytes in bone marrow, differences in enzyme content of, cytochemical and EM study, 299
Graphite, chemically cleaved, preparation of for support films for electron microscopy, description of technique and microdensitometric study, 733
Guinea pig, pancreas, dissociation of intracellular transport of secretory proteins from protein synthesis in exocrine cell of, biochemical and radioautographic EM study, 580
—, pancreas, metabolic requirements for intracellular transport of secretory proteins in exocrine cell of, biochemical and radioautographic EM study, 589
—, taenia coli, thick and thin myofilaments in smooth muscle of, EM study, 741

H

Hamster, kidney, role of microtubules in movement and alignment of nuclei in BHK21-F cells of induced by SV5 parainfluenza virus, time-lapse photomicrographic and polarization microscopic and EM study, 526
HeLa cells, turnover of DNA-like RNA in nuclei of, biochemical study, 112
Hormone, parathyroid, action of on excretion and synthesis of lysosomal enzymes and on extracellular release of acid by bone cells, biochemical and cytological study, 676
Human, blood lymphocytes, fine structural alterations of interphase nuclei of stimulated to growth activity in vitro, radioautographic and light and phase and EM study, 630
—, skin, inflammatory cells and epithelial-mesenchymal interrelations and fibrogenesis in repair of wounds of, EM study, 152
—, skin, superficial wounds of and epidermal regeneration, light and EM study, 135
—, uterine endometrium, atypical cilia in, EM study, 475

I

Ileum, of suckling rat, membrane modifications in apical endocytic complex of epithelial cells of, light and EM study, 564
Initial segment, and axon hillock, of small pyramidal neuron of cerebral cortex, of rat, light and EM study, 604
Insect, *Drosophila melanogaster*, cellular degeneration in wing development of mutant vestigial of, light and EM study, 488
—, *Drosophila melanogaster*, DNA synthesis in chromosomes of, radioautographic study, 415
—, *Rhodnius prolixus*, and amphibian *Rana pipiens*, effect of colchicine on in vivo myogenesis in, light and EM study, 544

Interphase, early, in *Amoeba proteus*, regulation of nucleocytoplasmic exchanges in by fibrous lamina, EM study of gold distribution, 49
—, of blood lymphocytes stimulated to growth activity in vitro, fine structural alterations of nuclei during, radioautographic and light and phase and EM study, 630
Ion transport and volume of mitochondria, expansion of inner membrane compartment and its relation to in rat liver, physical and EM study, 382
Ionic strength, structure of natural and reconstituted actomyosin as function of, studies on trypsin-treated actomyosin, EM study, 620
Ions, Ca^{++} and Sr^{++}, accumulation of in osmotically lysed rat liver mitochondria, biochemical and ultrastructural properties in relation to, biochemical and EM study, 661

K

Kinetoplast, of *Trypanosoma lewisi*, fine structure and replication of, radioautographic and EM study, 318

L

Larval stages (last two) of silkworms *Antheraea pernyi* and *Bombyx mori*, chondriome and agranular reticulum of secretory cells of prothoracic glands during, cytochemical and EM study, 501
L cells, Earle's, exposed to vinblastine sulfate, hypertrophy of granular endoplasmic reticulum and annulate lamellae in, EM study, 211
Leukocytes, polymorphonuclear, of rabbit, differences in enzyme content of azurophil and specific granules of, cytochemical and EM study, 299
—, polymorphonuclear, of rabbit, differences in enzyme content of azurophil and specific granules of, histochemical study of bone marrow smears, 286
Liver cells, of rat, localization of glutamic oxalacetic transaminase activity in, light and EM cytochemical study, 716
—, of fetal and newborn mouse, protracted maintenance of differentiation of in vitro, circumfusion system for multipurpose culture chambers, cytochemical and light and EM study, 439
—, of rat, acylation of lysophosphatides by plasma membrane fractions of, biochemical and EM study, 185
—, of rat, biochemical and ultrastructural properties in relation to divalent ion accumulation in osmotically lysed mitochondria of, biochemical and EM study, 661
—, of rat, expansion of inner membrane compartment of mitochondria and its relation to mitochondrial volume and ion transport, physical and EM study, 382
—, of rat, in vitro accumulation of calcium phosphate by mitochondria of, microincineration and electron diffraction and EM study, 55
—, of rat, localization of glutamic oxalacetic transaminase activity in mitochondria fixed *in situ* and in vitro, biochemical and histochemical EM study, 725
—, and oocyte, of urodele and anuran amphibia, size difference of DNA molecules of mitochondria of, physical and EM study, 222
Lymph nodes, cervical, of mouse, and rat trigeminal ganglia, fixed with pyroantimonate–osmium tetroxide, nuclear precipitates in, EM study, 216
Lymphocytes, of human blood, fine structural alterations of interphase nuclei of stimulated to growth activity in vitro, radioautographic and light and phase and EM study, 630
— of rat, aggregation and transformation of on rat embryo fibroblast monolayers, light and EM study, 392
Lysophosphatides, acylation of by plasma membrane fractions of rat liver, biochemical and EM study, 185

M

Malarial parasite, *Plasmodium gallinaceum*, morphological effects of pyrimethamine on erythrocytic stages of, light and EM study, 749
Membrane compartment, inner, of rat liver mitochondria, expansion of and its relation to mitochondrial volume and ion transport, physical and EM study, 382
—, in apical endocytic complex of ileal epithelial cells of suckling rat, modifications in, light and EM study, 564
Membranes, intranucleolar, and nuclear-cytoplasmic exchange in crayfish oocytes, EM study, 735
—, plasma, of rat liver, acylation of lysophosphatides by fractions of, biochemical and EM study, 185
Mesosomes (chondrioids), of *Bacillus subtilis*, structural features of after freeze-etching, EM study, 251
Metabolic requirements, for intracellular transport of secretory proteins in exocrine cell of guinea pig pancreas, biochemical and radioautographic EM study, 589
Microtubules, in differentiating muscle cells of frog, *Rana pipiens*, and insect *Rhodnius prolixus*, effect of colchicine on, light and EM study, 544
—, in sciatic nerve fibers, of toad *Bufo arenarum*, effect of low temperature on, EM study, 491
—, of cilia of gill of mussel *Elliptio complanatus*, "sliding filament" model of ciliary motility, EM study, 77
—, role of in movement and alignment of nuclei in syncytia of BHK21-F cells of baby hamster kidney induced by SV5 parainfluenza virus, time-lapse photomicrographic and polarization microscopic and EM study, 526
Millipore filters, fine structure and properties of, EM study, 208
Mitochondria, in root tip cells of bean *Phaseolus vulgaris*, atypical crista resembling "tight junction" in EM study, 35
—, of liver and oocyte of urodele and anuran amphibia, size difference of DNA molecules of, physical and EM study, 222
—, of rat liver, expansion of inner membrane compartment of and its relation to volume and ion transport of, physical and EM study, 382
—, of rat liver, fixed *in situ* and in vitro, localization

of glutamic oxalacetic transaminase in, biochemical and histochemical EM study, 725
Mitochondria, of rat liver, in vitro accumulation of calcium phosphate by, microincineration and electron diffraction and EM study, 55
—, of *Tetrahymena pyriformis*, synthesis of DNA in, quantitative radioautographic EM study, 369
—, osmotically lysed, of rat liver, biochemical and ultrastructual properties in relation to divalent ion accumulation in, biochemical and EM study, 661
Mitosis, in *Amoeba proteus*, redistribution of nuclear proteins during and following, studied by radioactive labeling and nuclear transplantation and cytoplasmic amputation, 404
—, synchronized division in *Tetrahymena pyriformis* following inhibition with vinblastine, cytological and light microscopic study, 556
Mitotic cycle, in root meristems of bean *Vicia faba* labeled with thymidine-^{3}H, evidence for two mitotically active cell populations, radioautographic study, 332
Mouse cervical lymph nodes, and rat trigeminal ganglia, fixed with pyroantimonate–osmium tetroxide, nuclear precipitates in, EM study, 216
—, embryo, bone cells of, or cultured fibroblasts from rat embryo carcass, action of parathyroid hormone on excretion and secretion of lysosomal enzymes and on extracellular release of acid by, biochemical and cytological study, 676
—, fetal and newborn, protracted maintenance of differentiated liver of in vitro, circumfusion system for multipurpose culture chambers, cytochemical and light and EM study, 430
—, spleen, use of ^{55}Fe in high-resolution radioautography of developing red cells of, EM radioautographic study, 201
Muscle, extraocular, of rabbit, fine structure of twitch and slow fibers of, EM study, 193
— fibers, of frog *Rana pipiens*, deposit formation in following contraction in presence of lead, EM cytochemical study, 197
—, skeletal, of chicken, mechanism of emptying of cell segments of, biochemical and light microscopic study, C1
—, skeletal, of fetal and newborn rats, sarcoplasmic reticulum at Z-line level in, light and EM study, 469
—, skeletal, of frog, selective disruption of sarcotubular system of, quantitative study with exogenous peroxidase as marker, light and EM study, 451
—, smooth, of guinea pig, thick and thin myofilaments of, EM study, 741
Mussel, *Elliptio complanatus*, lateral cilia of gill, "sliding filament" model of ciliary motility, EM study, 77
Myofilaments, thick and thin, in smooth muscle of guinea pig taenia coli, EM study, 741
Myogenesis, in frog *Rana pipiens*, and insect *Rhodnius prolixus*, effect of colchicine on, light and EM study, 544

N

Nematode, *Ascaris lumbricoides*, fine structure of sperm, mode of oocyte penetration, zygote formation, EM study, 119
Nerve, sciatic, of toad *Bufo arenarum*, effect of low temperature on microtubules of, EM study, 491
Neuroblasts, in spinal ganglia of chick embryo, confronting subsurface cisternae in, EM study, 485
Neuron, small pyramidal, of rat cerebral cortex, axon hillock and initial segment of, light and EM study, 604
Nuclear-cytoplasmic exchange and intranucleolar membranes in crayfish oocytes, EM study, 735
Nuclear division, of malarial parasite *Plasmodium gallinaceum*, morphological effects of pyrimethamine on, light and EM study, 749
— precipitates, in pyroantimonate-osmium tetroxide–fixed rat trigeminal ganglia and mouse cervical lymph nodes, EM study, 216
Nuclei, in syncytia of BHK21-F cells of baby hamster kidney induced by SV5 parainfluenza virus, role of microtubules in movement and alignment of, time-lapse photomicrographic and polarization microscopic and EM study, 526
—, interphase, fine structural alterations of, of blood lymphocytes stimulated to growth activity in vitro, radioautographic and light and phase and EM study, 630
—, of HeLa cells, turnover of DNA-like RNA in, biochemical study, 112
Nucleocytoplasmic exchanges, in *Amoeba proteus*, regulation of in early interphase by fibrous lamina, EM study of gold distribution, 49
Nucleoli, of crayfish oocytes, membranes within, nuclear-cytoplasmic exchange, EM study, 735
Nucleus, of *Amoeba proteus*, redistribution of proteins of during and following mitosis, studied by radioactive labeling and nuclear transplantation and cytoplasmic amputation, 404
—, zygote, of sea urchin, analysis of fertilization phenomena, EM study, 339

O

Oocyte, and liver, of urodele and anuran amphibia, size difference of DNA molecules of mitochondria of, physical and EM study, 222
—, of nematode *Ascaris lumbricoides*, mode of penetration of, fine structure of sperm, zygote formation, EM study, 119
Oocytes, of crayfish, intranucleolar membranes and nuclear-cytoplasmic exchange in, EM study, 735
Oogenesis, in amphibian *Necturus maculosus*, structural changes, pinocytosis, and biochemical activity in follicle during, biochemical and cytochemical and and radioautographic EM study, 1

P

Pancreas, of guinea pig, dissociation of intracellular transport of secretory proteins from protein syn-

thesis in exocrine cell of, biochemical and radioautographic EM study, 580
Pancreas, of guinea pig, metabolic requirements for intracellular transport of secretory proteins in exocrine cell of, biochemical and radioautographic EM study, 589
Parasite, malarial, *Plasmodium gallinaceum*, morphological effects of pyrimethamine on erythrocytic stages of, light and EM study, 749
Parenchyma, of rat tapeworm *Hymenolepis diminuta*, localization of glycogen in, biochemical and light and EM study, 754
Peroxidase, exogenous, marker in quantitative study of selective disruption of sarcotubular system in frog skeletal muscle, light and EM study, 451
Plant, bean, *Phaseolus vulgaris*, atypical crista resembling "tight junction" in mitochondria of root tip cells of, EM study, 35
—, bean *Vicia faba*, evidence for two cell populations in tritiated thymidine-labeled root meristems of, radioautographic study, 332
—, carrot explants, incorporation of radioactive proline into, radioautographic EM study, 698
—, corn seeds, localization of endogenous RNA polymerase activity in frozen sections of, radioautographic study, 745
—, onion *Allium cepa* L., cytoplasmic label following tritiated thymidine treatment of roots of, radioautographic light and EM study, 264
Plasma membrane fractions, of rat liver, acylation of lysophosphatides by, biochemical and EM study, 185
Precipitate formation in frog muscle fibers following contraction in presence of lead, EM cytochemical study, 197
Pronuclei, of sea urchin, fine structure of development and fusion of, light and EM study, 339
Protein-polysaccharide, in cartilage, of chick embryo, changes in associated with onset of calcification, light and EM study, 43
Protein, renewal of in rods and cones of retina of frog *Rana esculenta*, radioautographic EM study, 169
Proteins, nuclear, in *Amoeba proteus*, redistribution of during and following mitosis, studied by radioactive labeling and nuclear transplantation and cytoplasmic amputation, 404
—, secretory, in exocrine cell of guinea pig pancreas, dissociation of intracellular transport from synthesis of, biochemical and radioautographic EM study, 580
—, secretory, in exocrine cell of guinea pig pancreas, metabolic requirements for intracellular transport of, biochemical and radioautographic EM study, 589
Prothoracic glands, of silkworms *Antheraea pernyi* and *Bombyx mori*, structural modifications of chondriome and agranular reticulum of secretory cells of during last two larval stages, cytochemical and EM study, 501
Protozoan, *Acanthamoeba castellanii*, fine structure of trophozoite of, light and EM study, 95
—, *Amoeba proteus*, redistribution of nuclear proteins during and following mitosis in, studied by radioactive labeling and nuclear transplantation and cytoplasmic amputation, 404
Protozoan, *Amoeba proteus*, regulation of nucleocytoplasmic exchanges in early interphase by fibrous lamina of, EM study of gold distribution, 49
—, *Tetrahymena pyriformis*, synchronized cell division in following inhibition with vinblastine, cytological and light microscopic study, 556
—, *Tetrahymena pyriformis*, synthesis of DNA in mitochondria of, quantitative radioautographic EM study, 369
—, *Trypanosoma lewisi*, fine structure and replication of kinetoplast of, radioautographic and EM study, 318
Pterinosomes, and erythrophores, of goldfish, fine structure and biochemical characteristics of, cytochemical and biochemical and EM study, 233
Pyrimethamine, morphological effects of on erythrocytic stages of malarial parasite *Plasmodium gallinaceum*, light and EM study, 749

R

Rabbit, extraocular muscle, fine structure of twitch and slow fibers of, EM study, 193
—, polymorphonuclear leukocytes, differences in enzyme content of azurophil and specific granules of, histochemical study of bone marrow smears, 286
—, polymorphonuclear leukocytes, in bone marrow, differences in enzyme content of azurophil and specific granules of, cytochemical and EM study, 299
Radioactive label, amino acids-^{3}H, redistribution of nuclear proteins during and following mitosis in *Amoeba proteus*, studied by nuclear transplantation and cytoplasmic amputation, 404
— label, ^{45}Ca, action of parathyroid hormone on excretion and synthesis of lysosomal enzymes and on extracellular release of acid by bone cells, biochemical and cytological study, 676
— label, ^{45}Ca and ^{85}Sr, biochemical and ultrastructural properties in relation to massive ion accumulation by osmotically lysed rat liver mitochondria, biochemical and EM study, 661
— label, ^{55}Fe, use of in high-resolution radioautography of developing red cells, EM radioautographic study, 201
— label, histidine-^{3}H, methyl methionine-^{3}H, leucine-4,5-^{3}H, and phenylalanine-^{3}H, protein renewal in frog retinal rods and cones, radioautographic EM study, 169
— label, leucine-^{3}H, dissociation of intracellular transport of secretory proteins from protein synthesis, in exocrine cell of guinea pig pancreas, biochemical and radioautographic EM study, 580
— label, leucine-^{3}H, palmitate-^{14}C, glucose-^{14}C, sodium carbonate-^{14}C, metabolic requirements for intracellular transport of secretory proteins in exocrine cell of guinea pig pancreas, biochemical and radioautographic EM study, 589
— label, lysolecithin containing palmitic acid-^{14}C and choline-^{3}H, L-α-glycero-phosphate-^{14}C, ethanolamine-^{3}H, acylation of lysophosphatides by plasma

membrane fractions of rat liver, biochemical and EM study, 185
Radioactive label, $^{32}PO_4$ and uridine-^{14}C, turnover of nuclear DNA-like RNA in HeLa cells, biochemical study, 112
— label, proline-^{3}H, proline-^{14}C, incorporation of into cultured carrot cells, radioautographic EM study, 698
— label, thymidine-^{3}H, cytoplasmic label following treatment of *Allium cepa* L. roots with, radioautographic light and EM study, 264
— label, thymidine-^{3}H, DNA synthesis in chromosomes of *Drosophila melanogaster*, radioautographic study, 415
— label, thymidine-^{3}H, evidence for two cell populations in root meristems of bean *Vicia faba* labeled with, radioautographic study, 332
— label, thymidine-^{3}H, fine structural alterations of interphase nuclei of blood lymphocytes stimulated to growth activity in vitro, radioautographic and light and phase and EM study, 630
— label, thymidine-^{3}H, fine structure and replication of kinetoplast of *Trypanosoma lewisi*, radioautographic and EM study, 318
— label, thymidine-^{3}H, synthesis of DNA in mitochondria of *Tetrahymena pyriformis*, quantitative radioautographic EM study, 369
— label, uridine-^{3}H, lysine-^{3}H, leucine-^{3}H, structure, pinocytosis, and biochemical activity in pre- and postovulatory follicle of *Necturus maculosus*, biochemical and cytochemical and radioautographic EM study, 1
— label, uridine triphosphate-^{3}H, localization of endogenous RNA polymerase activity in frozen sections of corn seeds, radioautographic study, 745
Rat, cerebral cortex, axon hillock and initial segment of small pyramidal neuron of, light and EM study, 604
—, fetal and newborn, skeletal muscle fibers of, sarcoplasmic reticulum at Z-line level in, light and EM study, 469
—, liver, acylation of lysophosphatides by plasma membrane fractions of, biochemical and EM study, 185
—, liver, biochemical and ultrastructural properties in relation to divalent ion accumulation in osmotically lysed mitochondria of, biochemical and EM study, 661
— liver, expansion of inner membrane compartment of mitochondria and its relation to mitochondrial volume and ion transport, physical and EM study, 382
—, liver, localization of glutamic oxalacetic transaminase activity in, light and EM cytochemical study, 716
—, liver, localization of glutamic oxalacetic transaminase activity in mitochondria of fixed *in situ* and in vitro, biochemical and histochemical EM study, 725
—, liver mitochondria, in vitro accumulation of calcium phosphate by, microincineration and electron diffraction and EM study, 55
—, lymphocytes, aggregation and transformation of on rat embryo fibroblast monolayers, light and EM study, 392
Rat, suckling, membrane modifications in apical endocytic complex of ileal epithelial cells of, light and EM study, 564
— tapeworm, *Hymenolepis diminuta*, localization of glycogen in parenchyma of, biochemical and light and EM study, 754
— trigeminal ganglia, and mouse cervical lymph nodes, fixed with pyroantimonate–osmium tetroxide, nuclear precipitates in EM study, 216
Red cells, of mouse spleen, use of ^{55}Fe in high-resolution radioautography of, EM radioautographic study, 201
Regeneration, of epidermis in wounds, in humans, light and EM study, 135
Retina, of frog *Rana esculenta*, protein renewal in rods and cones of, radioautographic EM study, 169
RNA, DNA-like, turnover of in nuclei of HeLa cells, biochemical study, 112
Root tip cells, of bean *Phaseolus vulgaris*, atypical crista resembling "tight junction" in mitochondria of, EM study, 35
Roots, of onion *Allium cepa* L., cytoplasmic label following tritiated thymidine treatment of, radioautographic, light, and EM study, 264

S

Salamander *Necturus maculosus*, structure, pinocytosis, and biochemical activity in pre- and postovulatory follicle of, biochemical and cytochemical and radioautographic EM study, 1
Salivary gland, of *Drosophila melanogaster*, DNA synthesis in chromosomes of, radioautographic study, 415
Sarcoplasmic reticulum, at Z-line level, in skeletal muscle fibers of fetal and newborn rats, light and EM study, 469
Sarcotubular system, in frog skeletal muscle, selective disruption of, quantitative study with exogenous peroxidase as marker, light and EM study, 451
Sea urchin, *Arbacia punctulata*, fine structure of pronuclear development and fusion in, light and EM study, 339
—, *Lytechinus variegatus*, effect of proteolytic enzymes on ultrastructure of antibody-treated eggs of, relation to fertilization, EM study, 481
Silkworms, *Antheraea pernyi* and *Bombyx mori*, structural modifications of chondriome and agranular reticulum of secretory cells of prothoracic glands of during last two larval stages, cytochemical and EM study, 501
Skin, of human, inflammatory cells and epithelial-mesenchymal interrelations and fibrogenesis in repair of wounds of, EM study, 152
—, of human, superficial wounds of and epidermal regeneration, light and EM study, 135
Sodium, localization of, in nuclei of tissues fixed with pyroantimonate–osmium tetroxide, EM study, 216
Sperm, of nematode *Ascaris lumbricoides*, fine structure of, mode of oocyte penetration, zygote formation, EM study, 119

Spleen, of mouse, use of ^{59}Fe in high-resolution radioautography of developing red cells of, EM radioautographic study, 201
Support films, chemically cleaved graphite, for electron microscopy, description of technique and microdensitometric study, 733
Syncytia, in BHK21-F cells of baby hamster kidney, induced by SV5 parainfluenza virus, role of microtubules in movement and alignment of nuclei in, time-lapse photomicrographic and polarization microscopic and EM study, 526

T

Taenia coli, of guinea pig, thick and thin myofilaments in smooth muscle of, EM study, 741
Tapeworm, *Hymenolepis diminuta*, of rat, localization of glycogen in parenchyma of, biochemical and light and EM study, 754
Temperature, low, effect of on microtubules in sciatic nerve fibers of toad *Bufo arenarum*, EM study, 491
Toad, *Bufo arenarum*, effect of low temperature on microtubules in sciatic nerve fibers of, EM study, 491
Transport, intracellular, of secretory proteins in exocrine cell of guinea pig pancreas, dissociation of from protein synthesis, biochemical and radioautographic EM study, 580
—, intracellular, of secretory proteins in exocrine cell of guinea pig pancreas, metabolic requirements for, biochemical and radioautographic EM study, 589
Trophozoite, of protozoan *Acanthamoeba castellanii*, fine structure of, light and EM study, 95

U

Uterus, human, atypical cilia in endometrium of, EM study, 475

V

Vestigial mutant, of *Drosophila melanogaster*, cellular degeneration in wing development of, light and EM study, 488
Vinblastine sulfate, hypertrophy of granular endoplasmic reticulum and annulate lamellae in Earle's L cells exposed to, EM study, 211
—, synchronized cell division in *Tetrahymena pyriformis* following inhibition with, cytological and light microscopic study, 556
Virus, SV5 parainfluenza, role of microtubules in movement and alignment of nuclei in syncytia of BHK21-F cells of baby hamster kidney induced by, time-lapse photomicrographic and polarization microscopic and EM study, 526

W

Wing development, of mutant vestigial of *Drosophila melanogaster*, cellular degeneration in, light and EM study, 488
Wounds, superficial, of human skin, epidermal regeneration in, light and EM study, 135
—, superficial, of human skin, inflammatory cells and epithelial-mesenchymal interrelations and fibrogenesis in repair of, EM study, 152

Z

Z-line level, sarcoplasmic reticulum at, in skeletal muscle fibers of fetal and newborn rats, light and EM study, 469
Zygote formation, of nematode *Ascaris lumbricoides*, fine structure of sperm, mode of oocyte penetration, EM study, 119
